Our plan includes three shifts: (1) proactively build the capacity of local advocates and advocacy organizations and facilitate communication and collaboration between them to help catalyze action; (2) advance bike-friendly policies by also advocating for pedestrian, public transit and land use policies; and (3) expand our supports to competitive and noncompetitive bike events to support their success and the success of Bicycle Colorado.

Our focus on securing more public funding for bike infrastructure; ensuring that the design and construction of our transportation systems prioritize the safety and dignity of all people outside vehicles; passing bike-friendly laws and public policies; providing driver and bicyclist education.
